FINRA.org launches new Fund Analyzer upgrades

FINRA has just released several new upgrades to our popular [Fund Analyzer](#) tool, which lets you **compare** up to three mutual funds or exchange-traded funds side-by-side and **evaluate** the impact of fees and expenses over time on your investments. Using the new **Fund Screener**, you can now **search more than 23,000 funds and ETFs** on nine key criteria, making the task of finding funds that meet your objectives quicker and easier. And the new **Annual Expense Comparison** illustrates how a fund's expense ratio stacks up against an **industry average** of similar funds. Other new features include **one-click access** to a fund's prospectus and other disclosure documents, a **PDF report** you can print or save and a "**Share This**" function so you can send your report to others. Visit the [Fund Analyzer](#) at www.finra.org/FundAnalyzer.
