

EBRI Databook on Employee Benefits

Chapter 10:

Aggregate Trends in Defined Benefit and Defined Contribution Retirement Plan Sponsorship, Participation, and Vesting

Data-sets used in this chapter

U.S. Department of Labor, Bureau of Labor Statistics, National Compensation Survey – Tables 10.1a-d

The National Compensation Survey (NCS) covers the incidence and detailed provisions of selected employee benefit plans in private establishments. The data are presented as the percent of employees who have access to or participate in certain benefits, or as average benefit provisions.

Before 1999, data from the Employee Benefit Survey were released in three separate publications covering medium and large private establishments (establishments with 100 or more employees), small private establishments (establishments with 99 or fewer employees), and state and local governments. Starting with the 1999 data, BLS began publishing data for all private industry.

For further information on the data collection, survey methodology, and data usage please go to the following web site: <http://www.bls.gov/ebs/> in the section general overview.

U.S. Department of Labor, Employee Benefit Security Administration, Tabulations off the Form 5500 – Tables 10.2-10.4 and chart 10.1

In compliance with Title I of the Employee Retirement Income Security Act of 1974 (ERISA) all private-sector plan sponsors must file a Form 5500 with the IRS. These forms contain extensive financial, participant, and actuarial data. Such plans may be defined benefit or defined contribution. They generally cover private wage and salary employees and are sponsored either by employers or jointly by employers and unions.

U.S. Department of Commerce, Bureau of the Census, Current Population Survey, Employee Benefit Supplement and Survey of Income and Program Participation (SIPP) – Tables 10.5-10.9

Current Population Survey, Employee Benefit Supplement:

In May of 1979, 1983, and 1988 and in April 1993, supplementary questions were added to the Current Population Survey to collect data on workers' employee benefits. Over 27,000 workers were asked questions on pension and health care benefits. In the April 1993 supplement, a sample of workers and unemployed individuals answered questions on employee benefits in reference to a one-week period during April 1993. Individuals were classified as workers only if they worked during the reference week. If the person worked at some point during 1993 but were not working during the reference week they were not counted as workers.

Survey of Income and Program Participation:

The Survey of Income and Program Participation follows the same households for a four-year period, asking various questions on their economic and demographic status. The survey participants are interviewed at four-month intervals about a core set of questions. In addition topical modules ask more specific questions on important economic issues. A topical module asks questions about workers' participation in retirement and/or pension plans. These types of questions had been previously in the employee benefits supplement to the Current Population Survey.

U.S. Department of Commerce, Bureau of the Census, Current Population Survey, Annual Social and Economic (or March) Supplement – Tables 10.10-

This Annual Social and Economic (or March) Supplement provides the usual monthly labor force data, but in addition, provides supplemental data on work experience, income, non-cash benefits, and migration. Comprehensive work experience information is given on the employment status, occupation, and industry of persons 15 years old and over. Additional data for persons 15 years old and older are available concerning weeks worked and hours per week worked, reason not working full time, total income and income components, and residence on March 1, 2005. Data on employment and income refer to the preceding year, although demographic data refer to the time of the survey. This file also contains data covering nine non-cash income sources: food stamps, school lunch program, employer-provided group health insurance plan, employer-provided pension plan, personal health insurance, Medicaid, Medicare, CHAMPUS or military health care, and energy assistance. This file also contains data covering training and assistance received under welfare reform programs, such as job readiness training, child care services, or job skill training. Characteristics such as age, sex, race, household relationship, and Hispanic origin are shown for each person in the household enumerated.

Source: U.S. Department of Labor, Bureau of Labor Statistics, *Employee Benefits in Industry, 1980* (Washington, DC: U.S. Government Printing Office, 1981); *Employee Benefits in Medium and Large Firms, 1981- 1986 and 1988-1989* (Washington, DC: U.S. Government Printing Office, 1982-1987, and 1989-1990); *Employee Benefits in Medium and Large Private Establishments, 1991, 1993, 1995, and 1997* (Washington, DC: U.S. Government Printing Office, 1993, 1995, 1997, and 1999); *National Compensation Survey: Employee Benefits in Private Industry in the United States, 2000 Supplementary Tables* (Washington, DC: Bureau of Labor Statistics, 2003); *National Compensation Survey: Employee Benefits in Private Industry in the United States, 2003*(Washington, DC: Bureau of Labor Statistics, 2005).

^aIncludes only retirement and capital accumulation plans that provide for employer contributions. Freestanding accounts are not included.

^bThe Bureau of Labor Statistics (BLS) survey scope was expanded significantly in 1988 to include private nonfarm establishments employing 100 or more workers. The former survey coverage, which previously included full-time employees in establishments with 50, 100, or 250 workers, depending on industry, is referred to as old scope. The expanded survey coverage, which in 1988 and after includes full-time employees in private nonagricultural establishments employing 100 or more employees in the District of Columbia and all states except Alaska and Hawaii is referred to as new scope. In order to permit comparisons of 1988 findings with those of prior years, BLS also tabulated selected 1988 survey respondents for old scope establishments. In 1991 and following years, the survey includes establishments in Alaska and Hawaii.

^cData represents full-time and part-time employees.

^dDoes not include capital accumulation plans for years 1986, 1988, and 1991. Includes only retirement plans that do not allow withdrawal of employer contributions until retirement age, death, disability, separation from service, age 59 1/2, or hardship. The total is less than the sum because it does not include capital accumulation plans, and some employees participated in both defined benefit and defined contribution plans.

^eData not available.

^fLess than 0.5 percent.

Source: Employee Benefit Research Institute tabulations based on U.S. Department of Labor, Employee Benefits Security Administration, *Private Pension Plan Bulletin Historical Tables* (February 2008).

^aTwo significant changes have been made in the methodology used to create the *2005 Form 5500 Research File* and *Private Pension Plan Bulletin*. These changes have been necessitated by two new restrictions on the data received by the Employee Benefits Security Administration (EBSA). First, beginning in 2005, IRS Schedule T is no longer a required schedule. Information from this schedule was previously used to adjust the number of “active participants” to exclude 401(k)-eligible workers who did not elect to receive employer contributions and non-vested, separated employees who had not incurred a break in service. The loss of information from this schedule has prompted EBSA to discontinue its adjustment of “active participants” in favor of accepting the definition of active participant provided in the instructions to the Form 5500. This change also affects the number of “total participants” because the number of individuals previously excluded from “active participants” had also been excluded from “total participants.” Second, at the time the *2005 Private Pension Plan Bulletin* was completed, data from plan year 2005 was the most current, complete dataset available. Previously, the *Bulletin* relied on data from the year following the year in question. While some filers have already filed a Form 5500 for plan year 2006, these filings are currently far from complete. This change affects the methodology used in computing weights on the Research File.

^bExcludes single participant plans.

^cDue to rounding, sums of individual items may not equal totals.

^dIncludes active, retired, and separated vested participants not yet in pay status. Not adjusted for double counting of individuals participating in more than one plan.

^eFor workers covered under both a defined benefit and a defined contribution plan, the defined benefit plan is designated as the primary plan unless the plan name indicates it provides supplemental or past service benefits.

^fData not available.

UPDATED SEPTEMBER 2002

Table 10.3 (Form 5500) Primary Plan Trends by Plan Size

Source: Employee Benefit Research Institute tabulations of the May 1979, May 1983, May 1988, and April 1993 Current Population Survey employee benefit supplements, the 1996 Panel of the Survey of Income and Program Participation Topical Module 7, and the 2001 Survey of Income and Program Participation Topical Module 7.

^aThe fraction of workers whose employer or union sponsors a plan for any of the employees at the worker's place of employment.

^bThe fraction of workers participating in a plan among those whose employer or union sponsors a plan for any of the employees at the worker's place of employment.

^cThe Employee Retirement Income Security Act of 1976 work force is approximated by private sector nonagricultural wage and salary workers, aged 21 and over with 1 or more years of tenure on their current job who work 1,000 or more hours per year.

Other EBRI Research on Retirement Plan Participation -- Updated December 2009

► Defined Benefit Plan Freezes

How many firms that sponsor or sponsored a defined benefit plan, froze the plan?

See pages 4-6 in the [March 2006 Issue Brief "Defined Benefit Plan Freezes: Who's Affected, How Much, and Replacing Lost Accruals"](#)

Synopsis of four studies is presented, by the Pension Benefit Guaranty Corporation (2004), Aon Consulting (2003), Watson Wyatt (2005), and Mercer (2006).

How many firms that sponsor or sponsored a defined benefit plan, froze the plan?

See figure 3 on page 12 in the [July 2007 Issue Brief, "Retirement Income Adequacy After PPA and FAS 158: Part One—Plan Sponsors' Reactions"](#)

Data is presented on the following employer demographics: type of employer, industry, number of domestic employees, collectively bargained, type of DB plan, and likely immediate impact of PPA on minimum funding requirements.

What are reasons for an employer freezing a defined benefit plan?

See page 6 in the [March 2006 Issue Brief "Defined Benefit Plan Freezes: Who's Affected, How Much, and Replacing Lost Accruals"](#)

What are reasons for an employer freezing or closing a defined benefit plan?

See figures 4 and 5 on pages 14 and 15 in the [July 2007 Issue Brief, "Retirement Income Adequacy After PPA and FAS 158: Part One—Plan Sponsors' Reactions"](#)

Data is presented on the following employer demographics: type of employer, industry, number of domestic employees, collectively bargained, type of DB plan, and likely immediate impact of PPA on minimum funding requirements.

What are the factors which determine how much an employee needs to “make-up” in 401(k) plan contributions for the loss of benefit from a frozen defined benefit plan?

See pages 7-8 in the [March 2006 Issue Brief "Defined Benefit Plan Freezes: Who's Affected, How Much, and Replacing Lost Accruals"](#)

The text gives an example of a single individual and presents variables which would impact how much the individual would have to contribute to a 401(k) plan.

What is the impact of pension freeze on the general population of defined benefit plan participants in 2006??

See pages 7-8 in the [March 2006 Issue Brief "Defined Benefit Plan Freezes: Who's Affected, How Much, and Replacing Lost Accruals"](#)

Results are presented with two rates of return assumptions, 4 percent and 8 percent.

For overall results by plan type see page 9

For results by age and plan type see pages 9 and 12.

For results by tenure with the current employer at the time of the pension freeze and by plan type see page 12.

For results by remaining years to retirement after leaving job with the current employer and by plan type see page 12.

For results by tenure with employer after the pension freeze until job change and by plan type see pages 12 and 16.

► **Defined Benefit Plan Changes**

What changes have employers made to their defined benefit plan in the past two years and what changes are planned for the next two?

See figure 2 on page 11 in the [July 2007 Issue Brief, "Retirement Income Adequacy After PPA and FAS 158: Part One—Plan Sponsors' Reactions"](#)

► **Defined Contribution Plan Changes**

What changes have employers, that sponsor a DB plan, make to their defined contribution plan?

See figure 8 on page 18 in the [July 2007 Issue Brief, "Retirement Income Adequacy After PPA and FAS 158: Part One—Plan Sponsors' Reactions"](#)

Data is presented on the following employer demographics: type of employer, industry, number of domestic employees, collectively bargained, type of DB plan, and likely immediate impact of PPA on minimum funding requirements.

► **Current Population Survey Data**

How has employment-based retirement plan sponsorship and participation changed over time, 1987-2007?

Figure 19 on pages 25-26 in the [November 2009 Issue Brief "Employment-Based Retirement Plan Participation: Geographic Differences and Trends, 2008"](#)

Data is present for all workers, wage and salary workers ages 21-64, private-sector wage and salary workers ages 21-64, public-sector wage and salary workers ages 21-64, and full-time, full-year wage and salary workers ages 21-64

Figures 21-25 on pages 28-30, present data on wage and salary workers (ages 21-64) who participated in an employment-based retirement plan over time (1987-2008) by the following demographics: age, gender, race/ethnicity, educational level, annual earnings, work status, and employer size.

How many workers participated in an employment-based retirement plan by state, in 2008?

Figure 16 on page 21 in the [November 2009 Issue Brief "Employment-Based Retirement Plan Participation: Geographic Differences and Trends, 2008"](#)

Data is present for all workers, wage and salary workers ages 21-64, private-sector wage and salary workers ages 21-64, public-sector wage and salary workers ages 21-64, and full-time, full-year wage and salary workers ages 21-64

How many workers participated in an employment-based retirement plan by Consolidated Statistical Area, in 2008?

Figure 17 on page 22 in the [November 2009 Issue Brief "Employment-Based Retirement Plan Participation: Geographic Differences and Trends, 2008"](#)

Data is present for all workers, wage and salary workers ages 21-64, private-sector wage and salary workers ages 21-64, public-sector wage and salary workers ages 21-64, and full-time, full-year wage and salary workers ages 21-64

► **Survey of Consumer Finance Data**

What percentage of family heads participated in a defined benefit plan only, a defined contribution plan only, or both a defined benefit and defined contribution in 1992, 1995, 1998, 2001, and 2004? Data is presented by firm size and industry

Figure 2 on page 4 in the [February 2007 Notes article, "Retirement Plan Participation and Asset Allocation, 2004"](#)

Figure 2 on page 15 in the [November 2009 Notes article, "Retirement Plan Participation and Asset Allocation, 2007"](#) for 2007 data.

Data is presented for firm size and industry.

For data for 1992, 1998, and 2001 see Figure 1 on page 5 in the [July 2003 Issue Brief, "Individual Account Retirement Plans: An Analysis of the 2001 Survey of Consumer Finances"](#). Data is presented on the following demographic characteristics: family income, age of family head, education of family head, race, housing status, and net worth percentile.

For data for 1992, 2001, and 2004 see figure 2 on page 6 in the [May 2006 Issue Brief, "Individual Account Retirement Plans: An Analysis of the 2004 Survey of Consumer Finances"](#). Data is presented on the following demographic characteristics: family income, age of family head, education of family head, race, housing status, and net worth percentile.

► **Survey of Income and Program Participation Data**

What was the sponsorship, participation, and vesting rates among workers age 16 and over from 1979 to 2006?

Figure 1 on page 3 in [February 2009 Notes article "Retirement Plan Participation: Survey of Income and Program Participation \(SIPP\) Data, 2006"](#)

What was the participation rate among non-agricultural wage and salary workers age 16 and over from 1988-2006 by age?

Figure 3 on page 4 in [February 2009 Notes article "Retirement Plan Participation: Survey of Income and Program Participation \(SIPP\) Data, 2006"](#)

What was the participation rate among non-agricultural wage and salary workers age 16 and over from 1988-2006 by annual earnings?

Figure 4 on page 4 in [February 2009 Notes article "Retirement Plan Participation: Survey of Income and Program Participation \(SIPP\) Data, 2006"](#)

What percentage of wage and salary workers (age 16 or older), of those who participated in a current employer's retirement plan, participated in more than one plan, 1998 and 2003?

Figure 4 on pages 12 and 13 in [January 2006 Issue Brief "Retirement Plan Participation and Retirees' Perception of Their Standard of Living"](#)

Data is presented by: tenure, age, firm size, annual earnings, gender, union status, industry, race, education, and annual hours.

What percentage of wage and salary workers (age 16 or older) has retirement plan benefits from a former worker, 1998 and 2003?

Figure 4 on pages 12 and 13 in [January 2006 Issue Brief "Retirement Plan Participation and Retirees' Perception of Their Standard of Living"](#)

Data is presented by: tenure, age, firm size, annual earnings, gender, union status, industry, race, education, and annual hours.

What percentage of wage and salary workers (age 16 or older) has ever participated in an employment-based retirement plan, 1998 and 2003?

Figure 4 on pages 12 and 13 in [January 2006 Issue Brief "Retirement Plan Participation and Retirees' Perception of Their Standard of Living"](#)

Figure 6 on pages 16 and 17 present's data for all workers age 16 or older.

Data is presented by: tenure, age, firm size, annual earnings, gender, union status, industry, race, education, and annual hours.

What type of retirement plan was the primary plan among all non-agricultural wage and salary workers age 16 and over who participate in a plan from 1988-2006?

Figure 5 on page 6 in [February 2009 Notes article "Retirement Plan Participation: Survey of Income and Program Participation \(SIPP\) Data, 2006"](#)

Additional Databook Chapters on Retirement Plan Participation:

For data on participation in salary reduction plans see [chapter 12](#)

For data on participation in 401(k) plans see [chapter 13](#)

For data on participation in IRAs, see [chapter 15](#)
