32nd Annual Retirement Confidence Survey (RCS)

The RCS is the longest-running survey of its kind, measuring worker and retiree confidence about retirement, and is conducted by the Employee Benefit Research Institute (EBRI) and Greenwald Research.

The 2022 survey of 2,677 Americans was conducted online January 4 through January 26, 2022. All respondents were age 25 or older. The survey included 1,545 workers and 1,132 retirees – this year included an oversample of roughly 807 completed surveys among LGBTQ individuals (639 workers and 168 retirees).

Data were weighted by age, sex, LGBTQ status, household income, and race/ethnicity. Unweighted sample sizes are noted on charts to provide information for margin of error estimates. The margin of error would be ± 2.5 percentage points for workers, ± 3.0 for retirees, and ± 3.5 for LGBTQ respondents in a similarly sized random sample.

Please note percentages in the following tables and charts may not total to 100 due to rounding and/or missing categories. Any trend changes or differences in subgroups noted in text are statistically significant; if no trend changes are noted, there were no significant differences.
EBRI and Greenwald would like to thank the 2022 RCS sponsors who helped shape this year’s survey.

Americans remain optimistic about living a comfortable retirement. Unchanged from 2021, over 7 in 10 workers are at least somewhat confident, including almost 3 in 10 who are very confident (Figure 1). Retirees also remain confident, with nearly 8 in 10 confident they will have enough money to live comfortably throughout retirement, including 1 in 3 who are very confident (Figure 2).

Even as some of the effects of the pandemic abated this year, still a third of workers and almost a quarter of retirees say the pandemic has made them less confident in their retirement prospects (Figure 3 and Figure 4).

Those feeling less confident as a result of the pandemic and its economic impact were already among the more vulnerable and less retirement-ready Americans. They are more likely to report poor health, lower incomes and savings levels, and problems with debt (Figure 5).

Interestingly, a third of workers and half of retirees who feel less confident cite inflation and the cost of living as the reason for their declining retirement confidence (Figure 6 and Figure 7). In stark contrast, roughly 7 in 10 workers and retirees overall report being confident they will have enough money to keep up with inflation in retirement (Figure 8 and Figure 9).

Key Findings

7 in 10 workers
8 in 10 retirees
confident in having enough for a comfortable retirement

COVID Impact on Confidence

Less confident

1/3 workers
1/2 retirees
cite inflation as the reason

33% workers
24% retirees
Many believe their household’s long-term financial needs are different from others’, but most Americans prioritize retirement savings and investments.

Nearly half of workers and a third of retirees feel that their long-term financial needs are different than other households (Figure 10). However, there are goals in common — 6 in 10 workers and a third of retirees report saving and investing for retirement is among their top three longer-term financial goals. Half of retirees say planning for future health and long-term-care needs is a top priority, and more than a third of workers agree. Among both workers and retirees, about 3 in 10 say developing a strategy for drawing retirement income is a top-three goal (Figure 11 and Figure 12).

Only a third of workers and fewer than a quarter of retirees agree that retirement savings is not a priority relative to other needs of their family (Figure 13).

However, there are clearly challenges to this longer-term focus on retirement. 4 in 10 workers say that saving for or paying off a child’s college education reduces the amount they can save for retirement (Figure 14), and over 4 in 10 say that debt is negatively impacting their ability to save for retirement (Figure 15).

More than half of workers and over a third of retirees call debt a major or minor problem for their household (Figure 16). Roughly 2 in 10 workers and retirees report that developing a strategy for debt reduction is a top financial goal (Figure 11 and Figure 12).

Seventeen percent of workers place saving for a child’s education among their top long-term financial goals (Figure 11).
Many Americans don’t know where to go or who to trust for financial and retirement planning information.

Notably, almost 4 in 10 workers and 2 in 10 retirees say they don’t know who to go to for financial and retirement planning advice (Figure 17). Many turn to non-professional sources, like family and friends (35% of workers and 21% of retirees) or going online to do their own research (29% of workers and 23% of retirees) (Figure 18 and Figure 19).

Majorities generally believe that financial services companies understand how to help them with financial and retirement planning (Figure 20), and roughly a third of both workers and retirees currently work with a financial professional. Almost half of workers who don’t work with an advisor plan to work with one in the future (Figure 21).

A quarter of workers say they turn to their employer as a source of retirement planning information, though employers fall behind advisors, family and friends, and online research when it comes to being the most trusted source of information (Figure 22). Of note, 3 in 10 workers suggest they don’t feel fairly treated in the workplace, and a quarter report having trouble accessing employer-sponsored benefits for their dependents or beneficiaries (Figure 23).
Workers remain satisfied with their workplace retirement savings plans and with the tools and resources available.

More than 4 in 5 workers who are offered a workplace retirement savings plan are satisfied with the benefit (Figure 24). This is important given that workers (82%) remain far more likely than current retirees (47%) to expect their workplace defined contribution retirement plan to be a source of income in retirement (Figure 25, 26, and 27).

The same high share of plan participants say they are satisfied with the investment options available, although some admit they don’t fully understand some of the more common options available. For example, a third suggest they do not understand managed accounts, and half do not understand environmental, social, and governance (ESG) investment options. 4 in 10 indicate they do not understand target date funds (TDFs), how TDFs adjust over time, or how to select the right TDF for them (Figure 28).

Likewise, about 8 in 10 report being satisfied with the tools and resources available through their plan for both determining how much to save and determining how to generate income from their retirement savings. 6 in 10 plan participants say they have received information estimating how much monthly income their plan savings might be able to generate (Figure 29).
Workers envision a gradual transition to retirement and retirement funding that includes work for pay.

The median expected retirement age for workers — age 65 — and the reported retirement age of retirees — age 62 — remain unchanged (Figure 30). However, workers envision (or hope for) a gradual retirement transition to retirement and work for pay in retirement, which doesn’t match the experience of most retirees.

Though down from last year, 4 in 10 workers expect to gradually transition into retirement. Only 17% of retirees report having a gradual transition, while 73% say their retirement was a full-time stop (Figure 31).

In addition, 70% of workers think they will work for pay in retirement, while only 27% of retirees report doing so (Figure 32). A similarly large share of workers expect working for pay to be a source of retirement income — 68% expect this to be at least a minor source of income in retirement, compared with 22% of retirees who report this as a source of income (Figure 33 and Figure 34).

However, the RCS continues to demonstrate that nearly half of retirees retire earlier than they expected (Figure 35). 4 in 10 retirees report they retired early for the fortunate reason that they felt they could afford to, but fully two-thirds report their early retirement was for a reason out of their control, such as a health problem or disability, company downsizing or reorganizations, or caregiving for a loved one (Figure 36).
Most retirees report their overall lifestyle and expenses are as expected. However, up from last year, 1 in 3 find overall expenses to be higher than expected.

4 in 5 retirees report that their overall lifestyle — including traveling, spending time with family, or volunteering — is as expected or better. Over 1 in 4 say their retirement lifestyle is better than they expected. These results are virtually identical to previous years, including during pre-pandemic and pandemic periods (Figure 37).

However, 36% of retirees say their overall spending and expenses are higher than expected — an increase from last year. Also up from last year is the share reporting that housing and travel expenses, specifically, are higher than expected (Figure 38).

When asked what their top priorities for discretionary spending in retirement are (aside from paying for necessities and routine bills), almost half of retirees cite travel, and a third cite spending on leisure or entertainment activities. Still, 4 in 10 say they are holding money aside or investing for growth (Figure 39).
Workers’ confidence in Medicare and Social Security holds, but retiree confidence in Medicare declines.

Three-quarters of retirees and two-thirds of workers feel confident they will have enough money to take care of medical expenses in retirement.

Retirees report planning for health and long-term care is a top financial priority. Nearly 2 in 5 retirees say their health and dental expenses were higher than expected, which is comparable to last year. When applicable, about 1 in 5 retirees report long-term-care expenses that are higher than expected (Figure 38). Separate from spending on routine necessities and bills, almost 1 in 3 retirees say they continue to reserve money to ensure they have enough for health and long-term-care expenses (Figure 39).

Consistent with last year, almost 6 in 10 workers are confident that Medicare will continue to offer benefits of at least equal value to those received today. However, significantly down from last year, 7 in 10 retirees feel the same (Figure 40 and Figure 41).

Confidence in Social Security continuing to provide benefits of at least equal value to those received today has remained constant for both retirees (69%) and workers (52%) (Figure 42 and Figure 43).
Figure 1
As in 2021, slightly more than 7 in 10 workers are confident in having enough money to live comfortably in retirement.
Figure 2
Almost 8 in 10 retirees are confident they will have enough to live comfortably in retirement; this is comparable to 2021.

Overall, how confident are you that you (and your spouse) will have enough money to live comfortably throughout your retirement years?

All percentages shown are statistically significant.
Almost 6 in 10 workers who feel more confident in their ability to live comfortably since COVID report it was due to having money in savings or having good investments. Over a third of workers who feel less confident state it was due to inflation or cost of living increases.

What specifically has made you feel [more/less] confident about your ability to live comfortably throughout retirement?

**Workers who feel more confident n=167**
- Have money in savings, prepared well, good investments: 57%
- Good job, insurance, and benefits: 18%
- Feeling good, healthy, confident, have support: 11%
- Positive impact of the government, Social Security raise: 1%
- Other: 3%

**Workers who feel less confident n=611**
- Inflation/cost of living increase: 35%
- Negative government impact, Social Security decrease: 18%
- Unemployed, job difficulties, unexpected retirement, lack of good benefits: 17%
- COVID: 16%
- Savings/401(k) depleted, have nothing saved, struggling to make ends meet: 14%

Not previously asked
Almost three-quarters of retirees who feel more confident in their ability to live comfortably through retirement since COVID report it was due to having money in savings or having good investments. Half of retirees who feel less confident state it was due to inflation.

Retirees n=1,132

- 38% Currently work with a financial advisor
- 62% Don’t currently work with a financial advisor

Retirees not currently working with an advisor n=656

- 12% Will work with an advisor in future
- 88% Will not work with an advisor in future

↑ = Significantly higher than previous year, ↓ = significantly lower than previous year
Figure 22
Workers and retirees trust their personal financial advisor the most.

Which of the following do you trust the most?
Workers n=1,545, Retirees n=1,132

- A personal, professional financial advisor: Workers 22%, Retirees 33% (vs. 18% in 2021)
- Family and friends: Workers 18%, Retirees 11%
- Online resources and research you do on your own: Workers 14% (vs. 18% in 2021), Retirees 11%
- Your employer/work info: Workers 8%, Retirees 3%
- Financial experts or gurus in the media: Workers 5%, Retirees 2%
- Representatives from your workplace retirement plan provider: Workers 5%, Retirees 5%
- Online advice or advisors that provide guidance based on formulas: Workers 3%, Retirees 1%
- Other: Workers 8%, Retirees 5%
- None of these: Workers 18%, Retirees 31%

↑=Significantly higher than previous year, ↓=significantly lower than previous year
Figure 23
Fewer than 1 in 10 workers and 1 in 20 retirees trust their employer the most for financial information. At the same time, 3 in 10 workers and 6 in 10 retirees feel they haven’t been fairly treated at work.

To what extent do you agree or disagree with the following?
Workers n=1,545; Retirees n=1,132

- You feel you’ve been fairly treated in your workplace
  - Worker: 31% Strongly agree, 38% Somewhat agree
  - Retiree: 18% Strongly agree, 24% Somewhat agree

- You have had trouble accessing or utilizing employer-sponsored benefits for your dependents or beneficiaries
  - Worker: 5% Strongly agree, 19% Somewhat agree, 25% Disagree
  - Retiree: 5% Strongly agree, 6% Somewhat agree, 89% Disagree

Figure 29
3 in 5 workers who are currently contributing to a retirement savings plan say their employer offers information on their projected monthly income in retirement. 9 in 10 find it useful.

In recent years, a number of organizations have developed calculators to estimate how much a certain level of savings will provide as monthly income in retirement. Based on your current account balance and annual contributions, these calculators will provide estimates of what might be available from these plans in terms of monthly income. Do you receive this type of information from your employer?

Workers currently contributing money to a retirement savings plan n=675

- Yes: 60%
- No: 29%
- Don’t know: 11%

How useful (is it/would it be) to receive an estimate of the monthly retirement income you might expect from your (retirement) savings?

Workers currently contributing money to a retirement savings plan

- Who received income estimate n=360;
- Who did not receive estimate n=166

- Very useful: 51%
- Somewhat useful: 41%
- Not too useful: 8%
- Not at all useful: 1%
- Don’t know: 0%

- Received income estimate
- Have not received
Figure 30

First year asked* 1991 asked "employment"
Figure 34
3 in 4 retirees say working for pay is not a source of income in retirement.

To what extent is each of the following a source of income in retirement?
2022 Retirees n=1,132

Work for Pay

First year asked* 1991 asked "employment"
Figure 35
Nearly half of retirees say they retired earlier than expected.

Did you retire...?
Retirees n=1,132

- Earlier than planned
- About when planned
- Later than planned

First year asked
Figure 36

4 in 10 retirees say they retired earlier than planned because they could afford to; 1 in 3 say they had a health problem or disability (unrelated to COVID-19).

**Did you retire earlier than you planned because...?**

Retirees who retired earlier than planned n=533, Percent Yes

- You could afford to retire earlier than you planned: 38%
- You had a health problem or a disability, not related to COVID-19: 32%
- There were changes at your company, such as downsizing, closure, or reorganization, not due to the COVID-19 crisis: 23%
- You were offered an early retirement package or your employer incentivized you to take an early retirement: 19%
- You wanted to do something else: 15%
- You had to care for a spouse or another family member: 13%
- There were changes at your company, such as downsizing, closure, or reorganization, as a result of the COVID-19 crisis: 10%
- Because of changes in the skills required for your job or your skills no longer matching job requirements: 7%
- The nature of your work or risk associated with your work changed due to COVID-19, and you no longer wished to work anymore: 7%
- **As a result of the COVID-19 crisis, you were not comfortable with company changes, policies, and/or procedures: 5%
- You or someone in your household had an issue that was related to COVID-19: 4%

** Newly added in 2022;
Figure 37
Consistent with last year, more than half of retirees think their lifestyle in retirement is about what they expected it would be before they retired.

How does your overall lifestyle in retirement now compare to how you expected it to be before you retired? For example, are you traveling, spending time with family or volunteering as much as you expected?
Retirees n=1,132

% Better than expected:
- 2022: 26%
- 2021: 28%
- 2020: 28%

- Much better than expected
  - 2022: 8%
  - 2021: 10%
  - 2020: 9%

- Somewhat better than expected
  - 2022: 18%
  - 2021: 18%
  - 2020: 19%

- About the same as expected
  - 2022: 53%
  - 2021: 53%
  - 2020: 56%

- Worse than expected
  - 2022: 21%
  - 2021: 19%
  - 2020: 17%
In comparison to 2021, more retirees report that their overall spending is higher than expected. This is also true regarding housing and travel expenses.

↑=Significantly higher than previous year, ↓=significantly lower than previous year
After saving to grow money, travel is the top priority for use of retirement savings for workers and retirees. Retirees are more likely than workers to prioritize spending on travel and home improvements.

Aside from paying for basic necessities and routine bills, which of the following would you say are your top three priorities for how you use, or will use, or spend your retirement savings?

Workers who plan to retire n=1,345, Retirees n=1,132

- Holding money aside, saving, or investing the money so that it continues to grow: 41% vs. 40%
- Spending on travel: 38% vs. 45% (↑)
- Spending, saving, or holding money aside for health or long-term-care needs: 36% vs. 31% (↑)
- Spending the money on your own leisure or entertainment activities, such as dining out or purchasing electronics, media, or apparel: 34% vs. 35%
- Saving/holding money aside so that you can leave an inheritance: 22% vs. 19% (↑ vs. 19% in 2021)
- Spending on home improvements, renovations, or home furnishing: 20% vs. 24% (↑)

↑=Significantly higher than previous year, ↓=significantly lower than previous year; ↑=Significantly higher than Retirees, ↑=significantly higher than Workers
Figure 40
Worker confidence in consistent Medicare benefits remains steady, with nearly 6 in 10 who feel at least somewhat confident it will continue to provide benefits of equal value to today.

How confident are you that the Medicare system will continue to provide benefits of at least equal value to the benefits received by retirees today?
2022 Workers n=1,545

Very confident
Very or somewhat confident

First year asked
Figure 41
Compared to last year, retirees are less confident that Medicare benefits will be of at least equal value in the future.

How confident are you that the Medicare system will continue to provide benefits of at least equal value to the benefits received by retirees today?
2022 Retirees n=1,132

Very confident

Very or somewhat confident
