

## 2023 RCS FACT SHEET #6

# WORKPLACE RETIREMENT SAVINGS PLANS IMPACT ON ASSETS AND SATISFACTION

Are the levels of assets held by households having retirement plans larger than those without a plan? How satisfied are workers with workplace retirement savings plans? What do workplace retirement savings plan participants think would best improve the plans?

## Savings and Investments With and Without a Retirement Plan

Among workers who provided the value of their savings and investments outside of the value of their home and any defined benefit plan assets, 36 percent report that they have \$250,000 or more in assets, and 25 percent have less than \$10,000 (Figure 1). However, the savings and investments between those with and without a retirement plan (defined contribution plan, individual retirement account (IRA), or defined benefit plan) are starkly different. For those with a retirement plan, only 14 percent report less than \$10,000 in savings and investments, and 45 percent have \$250,000 or more. In contrast, 71 percent of those without a retirement plan have less than \$10,000 in savings and investments, and 45 percent have \$250,000 or more.

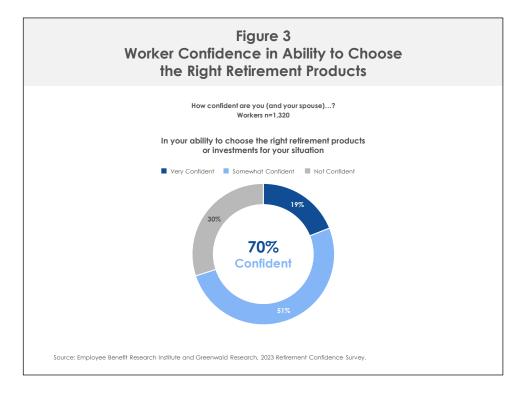

Worker Savings and Investments, With and Without a Retirement Plan*											
In total, about how much money would you say you (and your spouse) currently have in savings and investments, not including the value of your primary residence or defined benefit plan assets? 2023 Workers n=1,176											
	2014	2016	2017	2019	2020	2021	2022	2023	2023 Have Plan*	2023 No Plan	
Less Than \$1,000	36%	26%	24%	19%	18%	13%	19%	18%	7%	60%	
\$1,000 - \$9,999	16	16	14	10	9	8	8	8	7	11	
\$10,000 - \$24,999	8	12	9	11	8	6	6	7	7	7	
\$25,000 - \$49,999	9	10	8	9	6	7	8	5	5	6	
\$50,000 - \$99,999	9	10	10	9	12	12	10	8	9	6	
\$100,000 - \$249,999	11	12	15	19	17	21	15	18	20	7	
\$250,000 or More	11	14	20	23	30	33	33	36	45	4	

The difference between savings and investments of retirees with and without a retirement plan is just as glaring. Sixty percent of retirees with a retirement plan report having \$250,000 or more in savings and investments, while only 8 percent have less than \$10,000. Retirees without a retirement plan were much more likely to have less than \$10,000 in savings and investments at 63 percent. Only 5 percent of retirees without a retirement plan have \$250,000 or more in savings and investments.

\$250,000 or more	17	19	38	43	38	42	46	47	60	5	

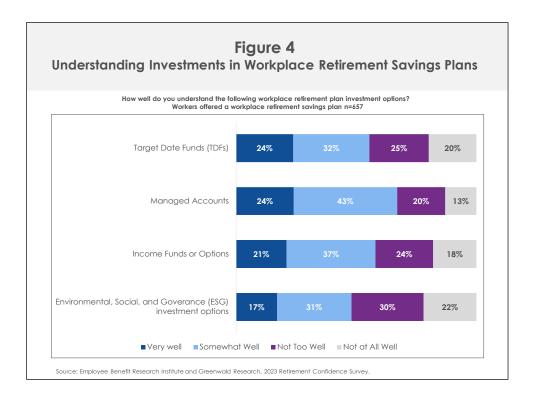

#### **Confidence in Choosing the Right Retirement Products**

Seventy percent of workers are very or somewhat confident in their ability to choose the right retirement products or investments for their situation. However, only 19 percent are very confident (Figure 3). Workers with any retirement plan are more likely to be confident in their ability to choose the right retirement products for their situation than those without a retirement plan (78 percent vs. 43 percent).

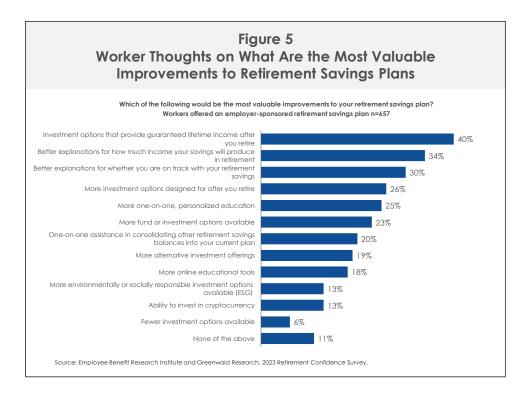

#### **Investments in Retirement Savings Plans**

Of workers offered a workplace retirement savings plan, 56 percent say they understand target date funds (TDFs) in general at least somewhat well (Figure 4). Furthermore, these workers are more likely to say that they understand managed accounts than they are to say they understand income funds or environmental, social, and governance (ESG) investment options.

#### **Improvements to Retirement Savings Plans**

When workers who are offered a workplace retirement savings plans are asked what the most valuable improvements to their workplace retirement savings plan are, the most cited improvements are investment options that provide <u>guaranteed</u> lifetime income <u>after</u> you retire (40 percent), better explanations for how much income their savings will produce in retirement (34 percent), better explanations for whether you are on track with your retirement savings (30 percent), and more investment options designed for <u>after</u> you retire (26 percent). About 1 in 5 of these workers also cite more one-on-one, personalized education (25 percent); more fund or investment options available (23 percent); one-on-one assistance in consolidating other retirement savings balances into your current plan (21 percent); more alternative investment offerings (private equity, real estate, etc.) (19 percent); and more online educational tools (18 percent). Fewer investment options (6 percent) is the least often cited improvement, but 11 percent of these workers choose none of the choices (Figure 5).

### **Actions Made in Workplace Savings Plans in the Past Year**

Thirty-seven percent of workers who are offered a workplace retirement savings plan report having increased their contributions in the past year, while 11 percent decreased the amount they contributed but continued to contribute and another 4 percent stopped contributing (Figure 6). Among the other actions offered, 16 percent of these workers report having switched to more conservative investments, 15 percent used a tool or calculator to estimate how much they need to save, and 12 percent contacted their retirement plan provider's representatives or service center for advice. However, 35 percent say they did none of these actions in the past year.
